Luke's Editorial

HOW GOOD WOULD IT BE IF THE 'NEW NORMAL' IN PLUMBING WAS TRADE ONLY?

Imagine a world where you needed to be a plumber to buy plumbing supplies. There would be significantly fewer jobs that did not comply with our current standards. This would mean safer gas installations, safer drinking water and safer sanitation. Our creeks and waterways would be cleaner as there would be less illegal trade waste and sewage entering these systems.

A plumbing licence would be an asset worth having. Plumbing businesses would be more profitable and would be able to pay their staff higher wages.

Thanks to the support of plumbers, Plumbers Choice is the fastest growing plumbing supplies in Australia. Our goal is to change the way plumbing supplies are sold in Australia to a Trade Only industry.

Maybe one day we will not need to imagine a Trade Only industry?

LUKE BOLTON - DIRECTOR, PLUMBERS CHOICE

THERMOCOUPLE TESTING AND TOOL KIT

WINTER
IS ~~COMING~~
HERE

Testing and replacement made easy

1
Unscrew the existing thermocouple from the control unit of the appliance.

2
Fit the end of the thermocouple into the tester. (If you need to, use the universal bush provided, you may need to gently flatten a section of the thermocouple tube to slip the bush on)

3
Light the pilot using the normal method for the appliance.

4
Whilst continuing to hold down the button on the appliance for 20 seconds, depress the spring on the testing device at the same time.

5
Release pressure on the thermocouple testing device spring only.

If the spring on the testing device remains closed then the thermocouple is working and power is being supplied to the electro-magnet in the testing device. If the spring releases while the pilot light is on, then the thermocouple is faulty and should be replaced.

plumtoolTM

- This kit includes spanners to suit any thermocouple and also includes a testing device to determine if the existing thermocouple is still working.
