www.plumberschoice.com.au

Luke's Editorial

Plumbers Choice was the first Trade Only Plumbing Supplier in the country, it's something to this day we are very proud of. Since then we are just as proud of the other suppliers who have followed suit in trying to change our industry for the better and have now become Trade Only also.

We still have to ask, Where are the industry's biggest players? And why won't they support a Trade Only industry?

Jacko has been a regular in our Magazines since day dot, he has been a symbol for a Trade Only Plumbing Industry. While the major suppliers are nowhere to be found, our friend Jacko is.

So in support of creating a stronger Plumbing Industry we are **giving away a \$500 Plumbers Choice Gift Voucher** to the first Plumber to correctly identify **how many Jacko's are hidden throughout this edition of the magazine.**

Simply email **marketing@plumberschoice.com.au** with your guess of how many times Jacko features in this edition of the magazine; The first plumber to submit the correct answer WINS!*

**Entries only open to Plumbers Choice customers*

CHS CHRIS HUNTER SALES

THERMOCOUPLE TESTING AND TOOL KIT

Testing and replacement made easy

1
Unscrew the existing thermocouple from the control unit of the appliance.

2
Fit the end of the thermocouple into the tester. (If you need to, use the universal bush provided, you may need to gently flatten a section of the thermocouple tube to slip the bush on)

3
Light the pilot using the normal method for the appliance.

4
Whilst continuing to hold down the button on the appliance for 20 seconds, depress the spring on the testing device at the same time.

5
Release pressure on the thermocouple testing device spring only.

If the spring on the testing device remains closed then the thermocouple is working and power is being supplied to the electro-magnet in the testing device. If the spring releases while the pilot light is on, then the thermocouple is faulty and should be replaced.

plumtool™

- This kit includes spanners to suit any thermocouple and also includes a testing device to determine if the existing thermocouple is still working.
