Clinton's Editorial

Plumbing Industry Hit Hard!

The plumbing industry has been hit hard in recent months. PVC costs have increased significantly, copper prices have reached record highs and the Middle East crisis has affected fuel prices impacting tradespeople who spend their time on the road more than most.

The pinch not only affects your bottom line but also your customers' willingness to spend. Increased job costs, inflation, and rising interest rates delay projects and cause customers to limit their spending.

We pride ourselves on minimising any price increases for you. We'll always let you know in advance when an increase is coming and try to avoid passing on as many as we can. One thing we will always cover you on is delivery costs.

Why spend your bottom line on fuel constantly going back and forth to suppliers when we can deliver it to your door free of charge on all orders over \$150*? With same day dispatch our free delivery service is Australia wide.

So next time you need to top up on gear, save some money at the bowser and give us a call!

CLINTON THOMAS
